

The **GSAS 248 3D** Digital Microscope stands out with its special lens design, offering both top and side view inspections. Its unique structure lets you easily switch between 2D and 3D views with a full 360-degree rotation while maintaining the same field of view. This makes it great for tasks like side soldering inspection and checking internal part quality. Plus, you can manually adjust the angle and position of observation points for a more intuitive experience.
